Marketing**

2007 – 2011
Université Pierre et Marie Curie &
SUPII MécaVENIR
Bachelor Pro: International Business
Development — Industrial Sector
L1 & L2 : Physics & Mechanics

After 13 years as a product manager leading B2B products and projects in different industries, I am taking my career in a new direction: putting AI & data at the heart of my practice. Roadmaps, multi-stakeholder alignment, product evangelism with clients and executive committees, this is the foundation I bring into this new chapter.

Currently enrolled in an MBA in AI & Data Innovation (De Vinci Executive Education, Top 10 Eduniversal, RNCP Level 7), I am building expertise in AI architectures, agentic frameworks and data governance with the goal of driving high-impact AI products and projects.

Expertise:

Artificial Intelligence & Data (skills being acquired):

- Machine learning, generative AI and agentic frameworks (LLM, RAG)
- Designing an AI pipeline for data reconciliation, pricing recommendation and price elasticity modelling across a large product catalogue : **MBA thesis**
- AI product evangelism: translating technical concepts for business, sales and partner audiences
- AI governance and ethics, legal frameworks, data valorisation

Product & Project Management:

- End-to-end product lifecycle management in international industrial environments
- Cross-functional coordination across R&D, marketing, sales and supply chain
- Innovation project management in complex B2B environments (multi-BU, international, long cycles)

Market Analysis & Qualification of Needs:

- Market trend analysis and product opportunity identification
- Qualitative and quantitative market research
- User focus group facilitation and customer needs analysis
- Product specification writing for both connected and non-connected products

Profitability, Business Plan & ROI:

- Pricing strategy and profitability analysis
- Business plan development, sales forecasting and KPI tracking

Strategic Planning:

- Mid and long-term strategic planning (product roadmap, feature prioritisation, positioning)
- Stakeholder alignment (R&D, marketing, executive committee) around strategic directions

Work experience :

08/2023 - 12/2025 LACROIX Environment – Les Chères, France
Product Manager – Smart Lighting – Europe, €13M portfolio

04/2018 – 07/2023 Groupe Atlantic – Bourg-la-Reine, France
